

Lab 04

Too Much Time

Objective:

Write a program that converts a given time to seconds, adds a number of seconds given by the user, and finally displays the new time. The time is entered in the format hours:minutes:seconds, and the results should display the same.

Example Dialog:

Enter a time in the following format "hours:minutes:seconds" and I will give you the time in seconds

10:01:30

The number of seconds are 36090

Enter a number of seconds to add

120

The new time is 10:3:30

Finally:

Upload the .java file to the dropbox
